

Khaled Hesham Hashem

Asp.net Back-End Developer

✉ kahled.pop.2003@gmail.com ☎ 01067297068 📍 Cairo 🌐 GitHub 🔗 LinkedIn

Profile

ASP.NET Core Developer proficient in **Microservices**, EF Core, and **RabbitMQ**. Experienced in delivering **Docker**-based production APIs and collaborating within **Agile** team environments.

Experience & Internships

Stock Square Backend Developer

Feb 2026 – Present

Shipped new features while **refactoring legacy code** to enhance performance and maintainability for production-deployed systems.

Backend Developer Trainee at Elevate Tech

Jul 2025 – Jan2026

Trained in **CQRS**, RabbitMQ, **MassTransit**, RedisCaching, Docker, **DockerHub**, and **CI/CD** pipelines. Practiced Agile methodologies and collaboratively built full-scale **microservices** projects under **senior mentorship** with rigorous peer code reviews.

Freelance Backend Developer

[\[Live Demo\]](#)

Led full-cycle development of production APIs, implementing **custom authentication** and ensuring scalable DB design with secure containerized delivery.

Asp.net Backend Course at Route (Nasr City)

Jul 2024 – Feb 2025

Learned C#, Advanced C# | SQL Server | LINQ | and Entity Framework Core Built real projects using ASP.NET Core Web API and MVC

Technical Skills

- Back-End Development: C# with ASP.NET Web API, MVC & SignalR
- Architecture & Microservices:
 - **Microservices**
 - **CQRS** (MediatR)
 - **YARP (API Gateway)**.
 - **DDD** (Domain-Driven Design)
 - **Clean Architecture**
 - **Vertical Slicing**
- Databases & Caching:
 - **SQL Server**
 - **Dapper**
 - **Redis In-Memory Caching**.
 - **Entity Framework Core**
 - **LINQ**
- Messaging & DevOps:
 - **RabbitMQ**
 - **Docker**
 - **CI/CD** Pipelines (GitHub Actions).
 - **Mass Transit**
 - **Docker Hub**
- Patterns & Principles:
 - **SOLID**
 - **Unit of Work**
 - **Specification Pattern**
 - **OOP**
 - **Generic Repository**
 - **Clean Code**.

- Tools & Monitoring:
 - Serilog
 - Fluent Validation
 - MailKit
 - Postman
 - Git/GitHub
 - **Agile**
 - Trello
- Frontend: HTML -CSS

Education

Higher Technological Institute (HTI)
Bachelor's degree in computer science

2021 –2025

Projects

1-E-Commerce Platform (Free Lance Project) [\[Live Demo\]](#)

- **Architecture & Core Features:** Developed a full-featured product catalog and Redis for cart caching | engineering a **complete order lifecycle** with stock validation and **automated email alerts** via MediatR and MailKit.
- **Security & Reliability:** Implemented a secure JWT auth system with refresh tokens, **dynamic permission-based RBAC** with **runtime policy generation**, and ensured reliability through **transactional pipelines** with automatic rollback and token-bucket rate limiting.

2-GiftShop E-commerce – Distributed Microservices Platform [\[GitHub Repository\]](#)

- **System & Team Workflow:** distributed **7 microservices** for orders and tracking using Redis for cart caching | RabbitMQ | developed **via User Stories with Code Reviews** and **Acceptance Tests** tracked on **Trello**.
- **Security & Deployment:** Implemented a **custom authentication system** with JWT | **CQRS** and deployed containerized services using **Docker**, **Docker Hub**, and GitHub **Actions CI/CD to Portainer**.

3-Fitness Management System – .NET 9 Microservices [\[GitHub Repository\]](#)

- **Architecture & Performance:** Engineered 8 microservices using **API Gateway** with **Rate Limiting**, **In-Memory Caching**, and **HttpClientFactory** to ensure high-speed, quality-tested delivery.

4-Exam Management System – ASP.NET Core Web API (Team Project) [\[GitHub Repository\]](#)

- **Core Logic & Reliability:** Engineered the full exam lifecycle (Assign → Retrieve → Submit) using Transaction Middleware and **Global Exception Handling** to ensure data integrity and seamless automated request processing.

5-Airport Management System – ASP.NET Core MVC [\[GitHub Repository\]](#)

Flight Operations & Booking: Managed complex flight scheduling and ticket booking workflows, utilizing **RBAC** for secure access and a responsive **Razor/Bootstrap** UI to streamline airport management operations.
